

BudgetWise Project Guide

Project Flow

Open app -> Choose menu -> Add/View/Analyze -> Save in file -> NumPy analysis -> Exit

Setup

Create main.py and expenses.txt. Separate code and data.

Menu

Use while loop. Keep menu running till exit.

Add Expense

Take amount + category. Decide data structure.

Save Data

Store as 500,Food using append mode.

View Expenses

Read file and split each line.

Functions

Break code into add_expense, view_expense, main_menu.

Exception Handling

Prevent crashes on invalid number input.

NumPy

Read amounts, create array, calculate sum/mean/max/min.

Analysis Menu

Display expense summary only when chosen.

Challenge

Add delete/search/category analysis yourself.
